Dear Hiring Team,

I am excited to apply for the Software Engineer Intern position. With a strong foundation in AI projects and hands on experience contributing to a company's SaaS product. I am eager to bring both technical skill and real-world product insight to your team.

During my previous internship, I worked on projects involving OCR, RAG systems, and document classification. I have also built projects integrating FastAPI backends with React frontends, and I am currently exploring LangChain and Azure services to enhance real-world AI applications. These experiences have developed my ability to deliver scalable solutions and quickly learn new tools.

I believe my blend of software engineering skills and applied AI experience would make me a strong contributor. I would welcome the chance to discuss how I can add value to your team.

Thank you for your time and consideration. I look forward to the opportunity to speak with you about this role.

Best Regards,

Chamika Thennakoon
